Think Security.

# ULTIMATE SECURITY MODEL PRACTICAL WORKSHOP

From Business Strategy to Operational Protection —  
Build a Security Program That Delivers Real Business Value.

Integrated.  
Traceable.  
Business-Aligned.

## THE WORKSHOP

The **Ultimate Security Model** is a comprehensive and agile methodology that connects your business objectives to security outcomes — ensuring that every control, process, and investment supports real business value.

This practical workshop gives you the knowledge, tools, and hands-on experience to implement the model in your organization. You will learn how to translate business context into a structured security program, prioritize risks, select the right controls, and maintain continuous improvement.

**The goal is not just to build more security.  
It's to build the right security —  
for your business.**

## WHO SHOULD ATTEND?

- CISOs, security managers and IT leaders
- Risk and compliance professionals
- Business executives and decision makers
- ISMS project leaders and implementation teams
- Anyone responsible for aligning security with business objectives

**Ideal for organizations of any size and sector  
that want a practical, business-aligned approach  
to information security.**

## WORKSHOP TOPICS

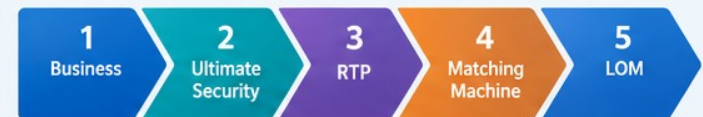

- 1 Business — Business Context & Cognition**  
Understand your business environment, identify key drivers and threats, and define security objectives that support your strategy.
- 2 Ultimate Security — Strategic Model & 20-Step ISMS**  
Focus on the 20% of processes and domains that create 80% of the risk reduction. Learn how to prioritize effectively and implement an efficient ISMS.
- 3 RTP — Risk Treatment Plan**  
Assess risks, estimate impact, and design prioritized treatment strategies using 27 domains, 16 principles, 85 standards, 45 frameworks, 30 guidance baselines, and best practices.
- 4 Matching Machine — Dynamic Multi-Layer Integration**  
Find the best products, technologies and solutions to close security gaps and ensure proper alignment with your needs.
- 5 LOM — List of Measures**  
Achieve 100% traceability from business drivers to implemented controls — eliminating orphan controls and unmonitored gaps.

## WHAT YOU WILL DO

- ✓ Work through real-world scenarios and case studies
- ✓ Use the model's tools and templates
- ✓ Build your own risk treatment plan
- ✓ Map controls to business drivers
- ✓ Collaborate in group exercises and get expert feedback

## THE FIVE-STAGE JOURNEY

Business Context → Risk Prioritization → Actionable Controls → Measurable Results

## KEY OUTCOMES

- ✓ Understand the full Ultimate Security Model and its components
- ✓ Learn how to apply the model in your own organization
- ✓ Develop a practical implementation roadmap
- ✓ Gain hands-on experience with real-world scenarios
- ✓ Walk away with tools, templates, and next steps

## DURATION & FORMAT

1 Day (virtual)  
Interactive sessions | Group exercises | Expert guidance
